# Facility Overview

Waste Hauling, Inc , formerly McKinney No  2 Landfill is a 40 acre site
in the Southwest one-fourth of the Southwest one-fourth of section 23 and
the northwest one-fourth of the northwest one-fourth of section 26,
Township 16 north, Range 1 east in Macon County, Illinois

Mr  Jerry Camfield Sr  assumed responsibility for the site on June 1, 1980,
with the actual permit being transfered on June 26, 1980

The initial application for a permit for this site was submitted in March of
1972 to cover approximately 40 acres   Due to the location and nature of the
site (sandy soils and partial flood plain location) and the desired operation
(cover excavation then area fill), the original operating permit only
authorized approximately 5 acres in the northeast corner of the property
This portion consisted mainly of clays and was not in the flood plain   Upon
receipt of more information and a modification of the plan (bascially removing
fill activity from the flood plain)  a supplemental permit was issued in
February of 1974 allowing use of the remaining 35 acres   Operation did not
start in the 35 acre tract until the Fall of 1979

The site is located less than one-quarter mile south of the Sangamon River
Agricultural land uses are predominant around the site   The closest residence
is less than one-quarter mile south of the site   The landfills entrance
road passes by this residence

Supplemental plan change permits were issued in 1973 and 1974 expanding the
wastes this site is authorized to accept   In addition to general refuse,
Waste Hauling may also accept an oil sludge from Firestone, a waste water
sludge from Quaker Oats, and a waste sludge from Caterpillar

The water monitoring program at this site consists of one well in the
northwestern part of the site   This well is approximately twenty feet deep,
and is screened from about 8 5 feet below ground to 18 feet below ground
